

Corrigendum

Corrigendum to “Survey: Automatic generation of attack trees and attack graphs” [Computers & Security Volume 137, February 2024, 103602]

Alyzia-Maria Konsta, Alberto Lluch Lafuente, Beatrice Spiga, Nicola Dragoni

Danish Technical University

The authors noticed articles relevant to the survey, which were made public at the same time of the processing of the proofs (during November 2023). The authors believe that readers of the survey will benefit from knowing that those papers exist and hence they would like to cite these articles. The articles are the following:

1. Dorfhuber, F., Eisentraut, J., Křetínský, J. (2023). Learning Attack Trees by Genetic Algorithms. In: Ábrahám, E., Dubslaff, C., Tarifa, S. L.T. (eds) Theoretical Aspects of Computing – ICTAC 2023. ICTAC 2023. Lecture Notes in Computer Science, vol 14446. Springer, Cham. https://doi.org/10.1007/978-3-031-47963-2_5
2. Gadyatskaya, O., Papuc, D. (2023). ChatGPT Knows Your Attacks: Synthesizing Attack Trees Using LLMs. In: Anutariya, C., Bonsangue, M.M. (eds) Data Science and Artificial Intelligence. DSAI 2023.

Communications in Computer and Information Science, vol 1942. Springer, Singapore. https://doi.org/10.1007/978-981-99-7969-1_18

3. Gadyatskaya, O., Mauw, S., Trujillo-Rasuac, R., Willemse, T.A.C.: Automated generation of attack trees with optimal shape and labelling (2023), <https://arxiv.org/abs/2311.13331>

The authors propose to add the following change in the paper:

To add a footnote at the end of sentence “We answered this question by providing a comprehensive and structured literature review of the field.” in section 8 (conclusion). The footnote would be “Shortly after our survey work, three relevant papers came to our attention. Two of them on using AI techniques to generate attack trees [1,2] and one on improving analysis-driven attack tree generation methods [3].”
